Introducing our NEW Mobile Elevated Work Platform Tagging system

"M.E.W.P. Tag"

The new MEWP tag has been specifically designed in accordance with **AS 2550.10 - 1995 Cranes—Safe use, Part 10: Elevating Work Platforms** to help manage the pre-operational inspections of Mobile Elevated Work Platforms (MEWPs) such as cherry pickers, genie booms and scissor lifts. This Standard is concise, but contains a wide range of information relating to safety preventative procedures such as pre-operational checks.

Water Proof

Highly Visual

The MEWP Tag system comprises of two components :-
1/ a holder which provides multiple attachment options (cable tie, adhesive, screw or rivet) and 2/ replaceable inserts which contain a quick-reference MEWP pre-operational inspection checklist, as well as a sign off on the reverse side for when checks are done.

The easier & more durable option than a log book!
